

This is clearly a job with the need for strong technical knowledge and therefore I had to fill quite some gaps in my IP knowledge as a newbie. During my first months, I had - and still have - the time to follow all sorts of trainings and courses, both online and at the Alcatel-Lucent University.

Bram De Valck - Network Design Engineer (2 years with Alcatel-Lucent)

The main attraction of this technical job for me, besides the insights in new technologies, is the job satisfaction you have when you get state-of-the-art technology and solutions working in your lab and see that what you test and integrate is used on a large scale by telecom operators all over the world in their communication networks."

Yves Carpentier - Level System Integration Engineer (17 years with Alcatel-Lucent)

Now, it's half past twelve, and every day at this time, I meet some colleagues - most of them former study mates - to have lunch in the zoo. Here, each employee of Alcatel-Lucent can eat at 'company restaurant prices'. The spring weather is fine today, so we can eat outside (but I keep my jacket).

Yannick Clybouv - Hardware expert (2 years with Alcatel-Lucent)

Do you want to get to know Bram, Yannick or Yves?

Do you want to meet our teams ?

Do you want to transform the way the world communicates & enrich people's lives ?

Do you want to visit the biggest research center in Belgium ?

Do you want to work not only on successful technologies but also on end-to-end communications solutions & services ?

Join our **Company event** for young graduates and juniors on **29th OR 30th of April!**

Your profile:

Are you in your **last year of a Master's degree in (Applied) Engineering Sciences; Electrical Engineering; Telecom; ICT; Computer Sciences** or do you have **up to 5 years of experience** ?

Do you have a passion for telecom?

Can you cope with complex systems & projects?

Do you like to take up a new challenge and enjoy learning and career opportunities?

Are you attracted by a multicultural environment?

Are you ready to find out ...?

- ➔ Who Alcatel-Lucent is?
- ➔ What our different technologies and solutions we work on?
- ➔ Why we differentiate from other telecom players?
- ➔ After the event you can apply for one of the 80 open top jobs for juniors and have an open discussion with us.
- ➔ In the end of the day you might receive a contract and start your journey with Alcatel-Lucent!

How to subscribe?

Send an e-mail by **16th of April 2010** at the latest to: jobs.recruitment@alcatel-lucent.com

Don't forget to mention your Name, your University/College and Specialization, date of preference & your motivation to participate to our event.
